FRESH IMPULSES FOR THE COLD SEASON

Dear LOWA Partners,

At LOWA, we are well aware that the current times in retail are far from easy. The economic situation and consumer climate are a challenge for all of us. To support you in this situation as much as we can, our teams work tirelessly to offer a compelling Fall_Winter 2025_26 collection that sets new incentives and purchase impulses. As always, we look to 2025 with optimism and confidence, and we will do our utmost to support you as a reliable partner through attractive products and solid delivery reliability. Below, we would like to briefly introduce some of these product initiatives.

Our revised trail running shoe, the **AMPLUX 2**, now features a waterproof GORE TEX membrane. Already a highly versatile shoe, it is not only suited for high-speed runs on challenging trails but also serves as a flexible companion in both mountainous and valley terrains. Thanks to its lightweight design, dynamic sole construction and complete waterproofing, it meets the demands of any outdoor sports enthusiast – the **AMPLUX 2 GTX**.

Last season, we launched our new product family, **KALOYA**, and for Fall_Winter 2025_26, it is expanding. We are adding the mid-cut **KALOYA GTX MID** to the stylish outdoor sneaker lineup. With its GORE TEX membrane and increased ankle support, it earns its place on the shelf, especially during the colder months. Key selling points include the ultra-soft EVA midsole for cushioning as well as the highly comfortable upper construction.

In addition to expanding our range, we have also focused on further developing our established winter models. Look forward to the **RENEGADE EVO ICE 2 GTX** – the updated classic winter boot – and the **OTTAWA EVO GTX**. Both models boast a modern look and offer proven functionality for snow, ice and freezing temperatures – just as you've come to expect from LOWA.

As always, even the youngest benefit from the expertise of our experienced product teams. Two of our most successful kids' winter boots, the **RAIK 2 GTX HI JR** and **LUCY 2 GTX HI JR**, are getting an update. Our promise of top-notch functionality and a modern, child-friendly design is fulfilled with features such as practical speed lacing, a waterproof GORE TEX membrane and visibility elements. Additionally, as you know, our kids' models are designed on a last specifically adapted to children's anatomy.

With the renewal of beloved classics and the launch of new commercial models for younger target groups, we hope to offer you an attractive range for the Fall_Winter 2025_26 season that ensures successful sales and supports your business goals.

Speaking of business goals: At LOWA, we are proud to announce the publication of our first sustainability report "Step by Step" in Fall 2024. After years of hard work, this report reflects our decades-long commitment to environ-

ment and people, while also highlighting areas where we can, must, and will continue to improve. I highly recommend reading it and look forward to your feedback, as well as to our ongoing, trusted collaboration with you.

Wishing you a successful Fall_Winter 2025_26 season!

Alexander Nicolai
CEO

"With the renewal of beloved classics and the launch of new commercial models for younger target groups, we offer an attractive collection for Fall_Winter 2025_26."

ACCESSORIES

The right care routine

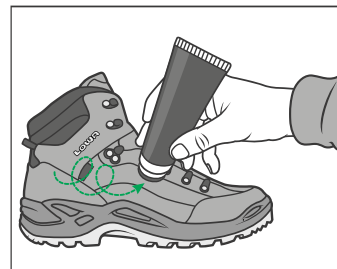

❶ Remove the insoles and laces

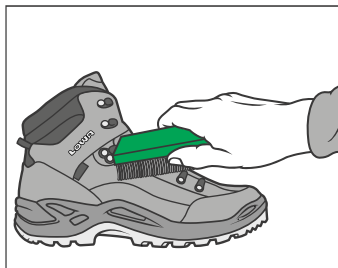

❷ Clean with lukewarm water, shoe cleaner and a soft brush

❸ Use waterproofing spray

❹ Wax

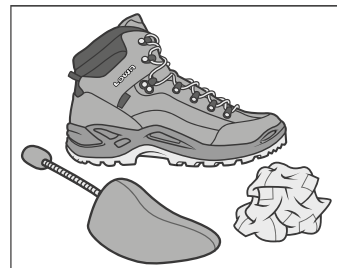

❺ Work it into the surface with a brush

❻ For suede leather models: roughen slightly – restore suede look

❼ Water test – water should be repelled

❽ Preserve boot shape

You will find detailed care instructions at www.lowa.com

lasts

NARROW LAST

NARROW LAST

In a narrow last, the forefoot area has a smaller volume than the same area in a normal last. Shoes made with an S last can feel more comfortable for people with slimmer feet.

WIDE LAST

WIDE LAST

In a wide last, the forefoot area has a greater volume than the same area in a normal last. Shoes made with a W last can feel more comfortable for people with special foot types (such as hallux valgus, flat foot, fallen arches, etc.).

outsoles

VIBRAM

Vibram has been one of the leading brands of high-quality soles for many years.

ARCTIC GRIP

VIBRAM ARCTIC GRIP

Vibram Arctic Grip is a state-of-the-art sole technology. The sole is made of a special rubber compound that is designed to deliver high performance and quality. The sole is designed to produce good grip on snowy surfaces.

ICETREK

VIBRAM ICE TREK

Engineered rubber compound suitable for low to very low temperatures to offer very good grip during winter conditions wheter it is on icy surfaces or cold terrain.

outsoles

RUBBER SOLE

LOWA RUBBER OUTSOLE

Conceived by LOWA to meet the challenges of real-world use, the profile design of the LOWA RUBBER OUTSOLE is made from an optimised rubber compound. The result is a rubber outsole with good traction in the backcountry and off trail.

PU SOLE

LOWA PU OUTSOLE

Made of polyurethane (PU), the LOWA outsole impresses users with a profile design that has been optimised with real-world challenges in mind. The strong combination of good cushioning behaviour and lightness turns these soles into an ideal foot-wear feature.

G+ SOLE

LOWA G+

This rubber compound developed just for winter has textile omponents which ensure sure-footed safety and grip when it is icy and slick underfoot.

TRAC

LOWA® TRAC®

The LOWA® TRAC® sole system and the sticky rubber compound provides guaranteed traction, in wet or dry conditions.

RESOLEABLE

RESOLEABLE

LOWA boots sold in the MOUNTAINEERING and TREKKING categories are designed in a way during the development phase that they can be resoled. The upper of the shoe is retained, and a new sole is added to it. This process will extend the shoe's service life and make a strong contribution to sustainability.

midsoles

STABILITY FRAME

With the LOWA MONOWRAP® frame, the midsole provides the very best comfort. This three-dimensional midsole design was developed by LOWA in 1995. The frame comfortably cradles the foot and supports it when the shoe wearer ventures across uneven surfaces. The sole design is slightly raised for shoes with a STABILITY FRAME.

SUPPORT FRAME

With the LOWA MONOWRAP® frame, the midsole provides the very best comfort. This three-dimensional midsole design was developed by LOWA in 1995. The frame comfortably cradles the foot and supports it when the shoe wearer ventures across an uneven surface. The sole design is slightly raised for shoes with a SUPPORT FRAME.

FIT FRAME

In this construction style, the sole is designed as a type of shell that forms a cosy home for the foot. This also creates a comfortable fit.

LOWA® DYNAPU®

The midsole is the leading contributor to the footwear's rolling properties and cushioning. This midsole is made of a specially developed plastic: LOWA® DYNAPU®. The special feature: It retains its restoring force even when it's pressed together thousands of times. As a result, the finished boots will maintain their exceptional cushioning properties even after you have walked many kilometres in them.

midsoles

LOWA® DYNAPU®+

LOWA® DYNAPU®+ is a specially developed foam padding used for the midsole of footwear. It plays a key role in the rolling properties and the cushioning of the footwear. The new LOWA® DYNAPU®+ offers even better recovery behaviour thanks to its special cell structure. This, in turn, creates an improved rebound effect for athletes. Even with constant use, the recovery behaviour does not lose any of its high performance qualities.

LOWA® DYNEVA

The midsole made of super light EVA foam ensures optimum cushioning and a high rebound effect over the entire length of the shoe. Sometimes bio-based materials such as sugar cane are also used.

LOWA® DYNAFOAM

The nitrogen-injected LOWA® DYNATPE midsole is characterised by its low weight, direct response and high rebound effect.

REBOUND PLATE

Our lightweight carbon reinforced midsole under the forefoot, gives runners energy return at every step.

footwear stiffness

VERY STIFF

Footwear labelled “very stiff” is particularly rigid. This means that the soles will remain firm even when subjected to stress.

STIFF

Footwear labelled “stiff” has a high degree of rigidity. This means that the soles will remain firm even when subjected to stress.

MODERATELY STIFF

Footwear labelled “moderately stiff” provides a good symbiosis between optimal support for the bending stiffness and comfortable rolling behaviour.

FLEXIBLE

Footwear labelled “flexible” has little rigidity. This quality supports the foot's natural rolling properties.

VERY FLEXIBLE

Footwear labelled “very flexible” has remarkably little rigidity. This footwear is characterised by exceptionally soft rolling properties.

upper technologies

BOA® FIT SYSTEM

With the help of a minimalistic twist-knob arrangement, the innovative BOA® Fit System guarantees maximum performance. The closure mechanism can be used easily and quickly. It delivers long-term comfort without having to be readjusted. It can also be operated with just one hand.

WASHABLE

Washable LOWA models are suitable for machine cleaning in accordance with the washing instructions attached to the respective product.

ZIPPER

The use of a zipper enables wearers to easily and quickly slip their footwear on and off.

linings

GORE-TEX

No matter whether you are scaling a steep mountain or strolling from café to café along chilly city streets of town – GORE-TEX footwear will always keep the feet pleasantly dry. Your footwear will always be water-proof and provide optimal breathability.

PRIMALOFT® 200

The PrimaLoft® insulation (200 g) is a synthetic, water-repelling insulation fibre. The exceptional warming performance delivered while keeping the weight down and offering the best compressibility is produced by a particularly thin polyester fibre. These ultra-fine polyester micro-fibres are bonded to one another at millions of contact points through the use of heat. This creates a tightly adhered fibre mesh that mimics the structure and functionality of down while countless small air chambers are created. The body's warmth is trapped here while the cold outside air is effectively repelled.

PRIMALOFT® 400

The PrimaLoft® insulation (400 g) is a synthetic, water-repelling insulation fibre. The exceptional warming performance delivered while keeping the weight down and offering the best compressibility is produced by a particularly thin polyester fibre. These ultra-fine polyester micro-fibres are bonded to one another at millions of contact points through the use of heat. This creates a tightly adhered fibre mesh that mimics the structure and functionality of down while countless small air chambers are created. The body's warmth is trapped here while the cold outside air is effectively repelled.

linings

LEATHER LINING

Thanks to its natural qualities, leather lining provides the foot with wearing comfort and a pleasant foot climate. Its adaptability, durability and absorbability make a leather lining the lining of choice for comfort-oriented outdoor fans.

TEXTILE LINING

A textile lining is pleasantly lightweight. The textile material is durable, easy to care for and comfortable.

LOWA TOE EXTRA

Kids 12 mm | Adults 15 mm

LOWA recommends based on the foot length (mm) a toe extra of 15 mm for adults (12 mm for kids). Due to individual foot shapes or preferences in fit this recommendation may vary.

The foot length (mm) is a recommendation of LOWA, which is based on scientific findings.
