DRIVERS OF A MODERN OUTDOOR IMAGE

Dear LOWA partners,

With last year's collection, we introduced a new generation of products that will have a lasting impact on our brand image. Your positive feedback has encouraged us to confidently continue on this path. We are committed to developing dynamic products that not only shape a modern, progressive image of outdoor but also perform strongly in the market. I am excited to present to you the Spring_Summer 2026 collection—a versatile range designed to meet both market demands and consumer needs.

Our roots lie in mountaineering—a legacy of our founding family Wagner that still drives us to create pioneering products for ambitious alpinists. With the new **CERVINO GTX MID**, we present an innovative alpine boot born from extensive development work. It combines exceptional climbing competence with outstanding stability, offering mountaineers absolute reliability in challenging terrain, thanks to its carbon-reinforced lasting board and deeply profiled sole.

The new **LOWA EXPLORER GTX MID** will be launched in Spring_Summer 2026 as a groundbreaking innovation in the TREKKING segment. It features a responsive LITECELL PU midsole, which will be used for the first time in our German production facility in Jetzendorf—a milestone for modern premium products in traditional cemented construction. Alongside excellent grip thanks to its Vibram outsole, the LOWA EXPLORER offers a highly adaptive fit and ensures maximum control on every step. It will also be available as a sporty low-cut version with approach capabilities.

Starting in Spring_Summer 2026, the **VENTIERRA GTX MID** will be the ideal companion for those who enjoy spontaneous outdoor adventures. With its cushioning DYNAPU® midsole and integrated shank for additional stability, it remains reliable even on more demanding trails up to the tree line. Thanks to a smooth lacing system and a padded collar, this shoe offers exceptional comfort. The women's model will be available as a quarter-cut version, and both men's and women's models will also feature a low-cut alternative.

Additionally, we are expanding our TRAIL RUNNING collection with the competition model **SKYTERRA**, a true endorphin booster. Its advanced DYNATPE® midsole, which provides outstanding cushioning and rebound properties throughout its entire length, offers unparalleled comfort and consistent forward momentum. Combined with a grippy Vibram outsole, the SKYTERRA guarantees maximum traction and reliability under the most demanding conditions.

One less worry for parents who value high-quality and functional kids' shoes: The **TRAILUX GTX LO JR** brings proven trail running technology to kids, featuring a lightweight DYNAEVA® midsole, a practical quick-lacing system, and a sporty, colourful design. The **WANDAX GTX MID JR** kids' hiking shoe stands out with a robust toe cap, an upper with a high proportion of suede, and a cushioning DYNAPU® midsole, ensuring optimal comfort and support for young adventurers.

Beyond a carefully curated collection, we are placing even greater focus on the end consumer in our marketing and communications efforts. With a cross-collection concept featuring emotionally engaging content and premium storytelling across both online and offline channels, we will successfully position our highlight models in the market and ensure their lasting desirability. We are confident that this approach will optimally support your sales efforts.

I wish you all the best and a successful season ahead!

Yours,
Alexander Nicolai
CEO, LOWA

"We will successfully position our highlight models on the market and ensure their long-term desirability in order to provide you with the best possible sales support."

TRAILUX GTX LO JR

Sizes (EU):	27 - 35 / 36 - 40
Merchandise Sub-Class:	MULTIFUNCTION
Weight:	350 g / pair
Main material:	textile, synthetic
Detailed material:	ripstop, PU
Lining:	GTX, Most Breathable Laminates
Insole:	STANDARD
Midsole:	DYNAEVA®
Sole:	LOWA® TRAILVENTURE JR

DYNA^{EVA}

ACCESSORIES

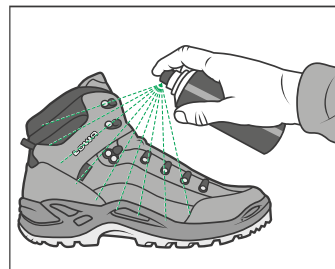

The right care routine

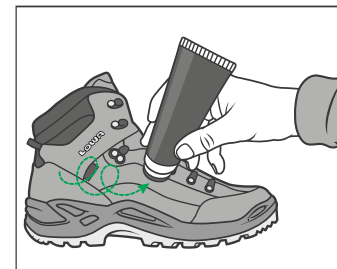

1 Remove the insoles and laces

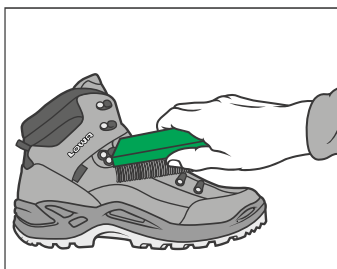

2 Clean with lukewarm water, shoe cleaner and a soft brush

3 Use waterproofing spray

4 Wax

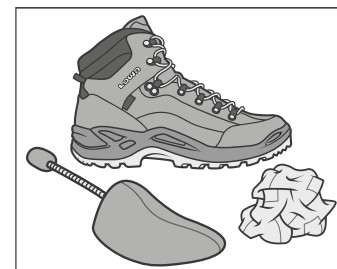

5 Work it into the surface with a brush

6 For suede leather models: roughen slightly – restore suede look

7 Water test – water should be repelled

8 Preserve boot shape

You will find detailed care instructions at www.lowa.com

SHOE CLEAN 200 ml

PU: 12 pieces

- outstanding cleaning efficiency
- over 90 percent natural elements
- perfect for shoes with a leather or textile upper as well as GORE-TEX footwear

830805 0111

ACTIVE CREME COLOURLESS 75 ml

PU: 8 pieces

- colourless care
- special formula that delivers a high level of care
- perfect for leather lining and GORE-TEX footwear

lasts

NARROW
LAST**NARROW LAST**

In a narrow last, the forefoot area has a smaller volume than the same area in a normal last. Shoes made with an S last can feel more comfortable for people with slimmer feet.

WIDE
LAST**WIDE LAST**

In a wide last, the forefoot area has a greater volume than the same area in a normal last. Shoes made with a W last can feel more comfortable for people with special foot types (such as hallux valgus, flat foot, fallen arches, etc.).

outsoles

**VIBRAM**

Vibram has been one of the leading brands of high-quality soles for many years.

outsoles

LOWA
RUBBER
SOLE**LOWA RUBBER OUTSOLE**

Conceived by LOWA to meet the challenges of real-world use, the profile design of the LOWA RUBBER OUTSOLE is made from an optimised rubber compound. The result is a rubber outsole with good traction in the backcountry and off trail.

LOWA
PU SOLE**LOWA PU OUTSOLE**

Made of polyurethane (PU), the LOWA outsole impresses users with a profile design that has been optimised with real-world challenges in mind. The strong combination of good cushioning behaviour and lightness turns these soles into an ideal footwear feature.

LOWA
TRAC**LOWA® TRAC®**

The LOWA® TRAC® sole system and the sticky rubber compound provides guaranteed traction, in wet or dry conditions.

RESOLEABLE

RESOLEABLE

LOWA boots sold in the MOUNTAINEERING and TREKKING categories are designed in a way during the development phase that they can be resoled. The upper of the shoe is retained, and a new sole is added to it. This process will extend the shoe's service life and make a strong contribution to sustainability.

midsoles

DYNA^{PU}® LOWA® DYNAPU®

The midsole is the leading contributor to the footwear's rolling properties and cushioning. This midsole is made of a specially developed plastic: LOWA® DYNAPU®. The special feature: It retains its restoring force even when it's pressed together thousands of times. As a result, the finished boots will maintain their exceptional cushioning properties even after you have walked many kilometres in them.

DYNA^{PU}®+ LOWA® DYNAPU®+

LOWA® DYNAPU®+ is a specially developed foam padding used for the midsole of footwear. It plays a key role in the rolling properties and the cushioning of the footwear. The new LOWA® DYNAPU®+ offers even better recovery behaviour thanks to its special cell structure. This, in turn, creates an improved rebound effect for athletes. Even with constant use, the recovery behaviour does not lose any of its high performance qualities.

DYNA^{EVA} LOWA® DYNEVA

The midsole made of super light EVA foam ensures optimum cushioning and a high rebound effect over the entire length of the shoe. Sometimes bio-based materials such as sugar cane are also used.

midsoles

SUPPORT FRAME

With the LOWA MONOWRAP® frame, the midsole provides the very best comfort. This three-dimensional midsole design was developed by LOWA in 1995. The frame comfortably cradles the foot and supports it when the shoe wearer ventures across an uneven surface. The sole design is slightly raised for shoes with a SUPPORT FRAME.

LITECELL PU

LITECELL PU is a new generation of PU material that, among other things, enables the production of lightweight shoes of the cemented construction type. Due to its low density, it is particularly light while maintaining high rebound properties, allowing for an exceptionally soft walking experience.

footwear stiffness

VERY STIFF

Footwear labelled "very stiff" is particularly rigid. This means that the soles will remain firm even when subjected to stress.

STIFF

Footwear labelled "stiff" has a high degree of rigidity. This means that the soles will remain firm even when subjected to stress.

MODERATELY STIFF

Footwear labelled "moderately stiff" provides a good symbiosis between optimal support for the bending stiffness and comfortable rolling behaviour.

FLEXIBLE

Footwear labelled "flexible" has little rigidity. This quality supports the foot's natural rolling properties.

VERY FLEXIBLE

Footwear labelled "very flexible" has remarkably little rigidity. This footwear is characterised by exceptionally soft rolling properties.

upper technologies

BOA® BOA® FIT SYSTEM

With the help of a minimalistic twist-knob arrangement, the innovative BOA® Fit System guarantees maximum performance. The closure mechanism can be used easily and quickly. It delivers long-term comfort without having to be readjusted. It can also be operated with just one hand.

linings

**GORE-TEX**

No matter whether you are scaling a steep mountain or strolling from café to café along chilly city streets of town – GORE-TEX footwear will always keep the feet pleasantly dry. Your footwear will always be water-proof and provide optimal breathability.

**PRIMALOFT® 200**

The PrimaLoft® insulation (200 g) is a synthetic, water-repelling insulation fibre. The exceptional warming performance delivered while keeping the weight down and offering the best compressibility is produced by a particularly thin polyester fibre. These ultra-fine polyester micro-fibres are bonded to one another at millions of contact points through the use of heat. This creates a tightly adhered fibre mesh that mimics the structure and functionality of down while countless small air chambers are created. The body's warmth is trapped here while the cold outside air is effectively repelled.

**PRIMALOFT® 400**

The PrimaLoft® insulation (400 g) is a synthetic, water-repelling insulation fibre. The exceptional warming performance delivered while keeping the weight down and offering the best compressibility is produced by a particularly thin polyester fibre. These ultra-fine polyester micro-fibres are bonded to one another at millions of contact points through the use of heat. This creates a tightly adhered fibre mesh that mimics the structure and functionality of down while countless small air chambers are created. The body's warmth is trapped here while the cold outside air is effectively repelled.

linings

**LEATHER LINING**

Thanks to its natural qualities, leather lining provides the foot with wearing comfort and a pleasant foot climate. Its adaptability, durability and absorbability make a leather lining the lining of choice for comfort-oriented outdoor fans.

**TEXTILE LINING**

A textile lining is pleasantly lightweight. The textile material is durable, easy to care for and comfortable.

LOWA TOE EXTRA

Kids 12 mm | Adults 15 mm

LOWA recommends based on the foot length (mm) a toe extra of 15 mm for adults (12 mm for kids). Due to individual foot shapes or preferences in fit this recommendation may vary.

The foot length (mm) is a recommendation of LOWA, which is based on scientific findings.
